## EXPERIENCE SUMMARY

I am a skilled, passionate, and result oriented Computer Science graduate, with a strong emphasis in Full Stack Web Development. I have hands-on experience in Back-end Development using Python, Django and Front-end Development using HTML, CSS, Bootstrap, jQuery, JavaScript, React and Angular. I am familiar with versioning technologies such as GIT and Design systems such as Figma, RESTful APIs. I have Interacted with relational databases such as PostgreSQL and SQLite Server. I am a fast learner and can grasp a framework within a span of a few days. I have experience in Cloud-Based Project Management Platforms such as Trello that make it easy to keep track of projects to ensure deadlines are met.

## KEY STRENGTHS/SKILLS/COMPETENCIES

- **Python** - Created a django based Instagram clone web application where a user can use CRUD operations to create, read, update and delete profile, comments and posts while using authentication methodologies.
- **React** - Built a class schedule web application which fetches APIs I created using Django framework.
- **JavaScript** - Created a movie app which fetches movies from the movie database and plays trailers from youtube.
- **Flask** - Created a news web application which fetches recent news from different news sites.
- **Leadership** - Led a team of developers during the project period, from project ideation to deployment period.

## PROJECTS SUMMARY

### The Movie App

The movie app fetches movies from the movie database then you can play the trailer on YouTube. Click the link below

<https://pascal-owilly.github.io/Movie-App/>

### News App

The news app fetches news from different news sites then display them on one page.
